

Speech, Language Pathology Services are provided by Certified Speech-Language Pathologists.

Target Population: Families with children from birth to 12.

Speech Language Pathology staff:

- facilitate the early identification of children with a communication delay
- refer children who are eligible for services to the appropriate resource
- train, educate and consult with parents and professionals on techniques to promote optimal communication development
- treat children who may not be eligible for public school or Sooner Start early intervention programs
- promote health habits which decrease the likelihood that children will be born with, or acquire, a communication disorder.
